

# Ceramic Barcode Labels

Fused ceramic coating on steel base

- Solve your most difficult labeling challenges in high temperature environments.
- Achieve reliable barcode identification for work-in-process tracking where all other solutions fail.
- Experience exceptional read rates and dependable data collection with the superior contrast of a crisp white background.
- Choose the ultimate long life of ceramic durability.

## FEATURES

- Rated 100 years + outdoor service.
- Embedded image provides unparalleled durability.
- Outstanding resistance to heat, cold and chemical exposure.

### Conforms to Industry Standards:

**MIL-DTL-19834C**  
**MIL-DTL-15024F**  
**ISO 15416**  
**ANSI-X3.182-1990**  
**RoHS, WEEE, REACH**  
as well as other applicable standards.

## BARCODES

- Any barcode symbology may be utilized, including linear or two-dimensional codes. Multiple barcodes and multiple symbologies can be imaged on each part.
- Variable data can be generated from any sequence you specify or in the case of complex or random data you may provide an electronic data file.
- Our rigorous Quality Management System and robust data management services ensure data integrity and complete delivery.

## MATERIALS

- Ceramic fused to stainless steel alloy 304, 316 or other as required.
- Available in thickness ranging from .018" to .036".
- Produced in virtually any size or shape.
- Produced with one or more holes for mechanical attachment or without holes for spot welding to location.
