

# Steel Barcode Labels

## Etched and filled

- Combining the lifetime durability of traditional steel nameplate with barcode technology.
- Chemically deep etched, then filled with baked enamels for enhanced readability and superior durability.
- Rugged corrosion resistant stainless steel alloy 304 or 316.
- Decades of dependable service in the most severe environments.

## FEATURES

- Digitally imaged for extreme precision and high resolution graphics.
- Outstanding resistance to heat, cold and chemical exposure.

### Conforms to Industry Standards:

**MIL-DTL-15024F**  
**ISO 15416**  
**ANSI-X3.182-1990**  
**RoHS, WEEE, REACH**

as well as other applicable standards.

## BARCODES

- Any barcode symbology may be utilized, including linear or two-dimensional codes. Multiple barcodes and multiple symbologies can be imaged on each part.
- Variable data can be generated from any sequence you specify or in the case of complex or random data you may provide an electronic data file.
- Our rigorous Quality Management System and robust data management services ensure data integrity and complete delivery.

## MATERIALS

- Available in thickness ranging from .018" to .036".
- Stainless steel alloy 304 or 316 with 2B mill finish.
- Produced in virtually any size or shape.
- Produced with holes for mechanical attachment or with permanent adhesive backing.
