Kapton® UID Labels
Polyimide material

05-08 Z.90024.1

- **Satisfy your UID labeling requirements and achieve MIL-STD-130 compliance with confidence.**

- **Enhance your product appearance with attractive and functional labels guaranteed to meet government specifications and last for decades.**

- **Complete your required WAWF registration process with ease and confidence through the optional Express registration process.**

FEATURES

- *Every UID label order is verified and certified to be in compliance with government specifications.*
- *A detailed label verification analysis report is provided with every shipment, certifying conformance of your labels.*
- *Labels feature exceptional durability and effective resistance to the effects of heat, cold, abrasion, chemicals, and prolonged weather exposure.*
Conforms to Industry Standards:

MIL-STD-130N
STANAG 2290
MIL-STD-13231
MIL-PRF-61002B
RoHS, WEEE, REACH
as well as other applicable standards.

BARCODES

- Include DataMatrix or combination of DataMatrix and linear barcodes to satisfy your requirements.
- Engineered to meet your needs regarding required data format and construct.
- Precise high resolution imagery provides optimum barcode readability.
- Electronic transfer of your data file is available to simplify your procurement process.
- Our rigorous Quality Management System (ISO 9001:2008) and robust data management services ensure complete data integrity.

MATERIALS

- .0027" polyimide with .002" premium permanent acrylic adhesive backing.
